

Monitor your loved one's health wherever they are.

SeniorConnect

Connected Care by SJMC

In Subang Jaya Medical Centre (SJMC), we believe in facilitating an integrated and accessible healthcare experience to meet the needs of our patients.

SeniorConnect is a remote patient monitoring service for elderly patients aged 65 years old and above, who are living independently with a caregiver.

Our remote monitoring kit enables the individual's vital signs to be taken by a caregiver, which is then recorded automatically and monitored in real-time by our team of healthcare professionals in SJMC.

1 Patient's vitals are taken at home.

2 Results are recorded on the hospital clinician's dashboard and family members or caregivers can monitor vitals from a link.

3 Nurses at TeleConnect are also monitoring from the hospital clinician's dashboard.

4 TeleConnect team will contact the caregiver in the event of irregularities and guide them in seeking medical attention.

Vital Signs Monitoring

Blood pressure

Temperature

Pulse

Oxygen saturation

Blood glucose level

Get started with our SeniorConnect service

1 Contact our team at TeleConnect at +603 56391818, available daily from 8am to 6pm.

2 You will be referred to our medical specialist in SJMC for an in-clinic assessment.

3 After the assessment and found to be suitable for this service, our TeleConnect team will brief you on the use of the SeniorConnect Kit.

4 Subscription fees will be made either in cash or credit card payment.
